The Venera (Russian: ????????, pronounced [vʲɛnʲɛnʲɪrʲ]) series space probes were developed by the Soviet Union between 1961 and 1984 to gather data from Venus, Venera being the Russian name for Venus. As with some of the Soviet Union's other planetary probes, the later versions were launched in pairs with a second vehicle launched soon after the first.

The Vostok programme (Russian: ????????, IPA: , Orient or East) was a Soviet human spaceflight project to put the first Soviet citizens into low Earth orbit and return them safely. Competing with the United States Project Mercury, it succeeded in placing the first human into space, Yuri Gagarin, in a single orbit in Vostok 1 on April 12, 1961. The Vostok capsule was developed from the ...

Revolutions in Russia - History With Mr. Green

I was born and raised Mormon and was a missionary long ago. I was eventually “converted” to atheism by science, not social issues. Step by step, science is finding explanations for things that had once seemed impossible to explain without resorting to an infinitely powerful God.
