Angiology (from Greek $\alpha\gamma\iota\omicron\lambda\omicron\gamma\iota\alpha$, $\alpha\gamma\epsilon\lambda\omicron\nu$, "vessel"; and $-\lambda\omicron\gamma\iota\alpha$, $-\lambda\omicron\gamma\iota\alpha$) is the medical specialty which studies the diseases of the circulatory system and of the lymphatic system, i.e., arteries, veins and lymphatic vessels, and its diseases.. In the UK, this field is more often termed angiology, and in the United States the term vascular medicine is more frequent.

This clinical report covers diagnosis and prevention of iron deficiency and iron-deficiency anemia in infants (both breastfed and formula fed) and toddlers from birth through 3 years of age. Results of recent basic research support the concerns that iron-deficiency anemia and iron deficiency without anemia during infancy and childhood can have long-lasting detrimental effects on neurodevelopment.
