1. Introduction. No-show appointments (also commonly referred to as broken or missed appointments) are a burden to essentially all healthcare systems, significantly impacting revenue, cost and use of resources [ , ]. It is a well-known fact that no-show decreases the provider's productivity and efficiency, increases healthcare costs, and limits the health clinic's effective capacity [ , ].

Nursing assessment is the gathering of information about a patient's physiological, psychological, sociological, and spiritual status by a licensed Registered Nurse. Nursing assessment is the first step in the nursing process. A section of the nursing assessment may be delegated to certified nurses aides. Vitals and EKG's may be delegated to certified nurses aides or nursing techs.

Hospital-Based Triage of Obstetric Patients. ABSTRACT: Emergency departments typically have structured triage guidelines for health care providers encountering the diverse cases that may present to their units. Such guidelines aid in determining which patients must be evaluated promptly and which may wait safely, and aid in determining anticipated use of resources.

Adolescent obesity in the United States has many important implications for both the health and well-being of the individual and society. Specific negative impacts of obesity on health include increased susceptibility to a host of diseases, chronic health disorders, psychological disorders, and premature death, 1 2 which in turn add billions of dollars in health care costs each year.
