Description. Taphonomic phenomena are grouped into two phases: biostratinomy; events that occur between death of the organism and the burial, and diagenesis; events that occur after the burial. Since Efremov's definition, taphonomy has expanded to include the fossilization of organic and inorganic materials through both cultural and environmental influences.

Honors. Criteria used by the School of Physical Sciences in selecting candidates for honors at graduation are as follows: Approximately 2 percent will be awarded summa cum laude, 4 percent magna cum laude, and 10 percent cum laude. Honors are awarded on the basis of a student's performance in research, cumulative grade point average, and performance in upper-division courses in the major.
