CICLing 2005 (www.CICLing.org) was the 6th Annual Conference on Intelligent Text Processing and Computational Linguistics. It was intended to provide a balanced view of the cutting-edge developments in both the theoretical foundations of computational linguistics and the practice of natural-language text processing with its numerous applications.

Computational Linguistics and Intelligent Text Processing

Work in computational linguistics is in some cases ... Computational linguistics is the application of linguistic theories and computational techniques to problems of natural language processing. ... intelligent word processing: spelling correction, grammar correction

Introduction to Computational Linguistics

CICLing (International Conference on Computational Linguistics and Intelligent Text Processing; before 2017 known under the name International Conference on Intelligent Text Processing and Computational Linguistics) is an annual conference on computational linguistics (CL) and natural language processing (NLP). The first CICLing conference was held in 2000 in Mexico City.

International Conference on Computational Linguistics and

Computational linguistics is an interdisciplinary field concerned with the statistical or rule-based modeling of natural language from a computational perspective, as well as the study of appropriate computational approaches to linguistic questions.

Computational linguistics - Wikipedia

Discourse in Computational Linguistics and Artificial Intelligence ... fundamental questions within computational linguistics and artificial intelligence. First, what ... the literature on discourse in computational linguistics has discussed two additional types of structure. One of them, rhetorical ...

Discourse in Computational Linguistics and Artificial

Computational Linguistics is the longest-running publication devoted exclusively to the computational and mathematical properties of language and the design and analysis of natural language processing systems. This highly regarded quarterly offers university and industry linguists, computational linguists, artificial intelligence and machine ...

Computational Linguistics and Intelligent Systems Conference

Computational linguistics is the scientific and engineering discipline concerned with understanding written and spoken language from a computational perspective, and building artifacts that usefully process and produce language, either in bulk or in a dialogue setting.

Computational Linguistics (Stanford Encyclopedia of

Computational linguistics is the scientific study of language from a computational perspective. Computational linguists are interested in providing computational models of various kinds of linguistic phenomena. These models may be "knowledge-based" ("hand-crafted") or "data-driven" ("statistical" or "empirical").
