

COMPUTER AIDED REASONING ACL2 CASE STUDIES 1ST EDITION

computer aided reasoning acl2 pdf

Automated theorem proving (also known as ATP or automated deduction) is a subfield of automated reasoning and mathematical logic dealing with proving mathematical theorems by computer programs. Automated reasoning over mathematical proof was a major impetus for the development of computer science.

Automated theorem proving - Wikipedia

This is a list of computer scientists, people who do work in computer science, in particular researchers and authors.. Some persons notable as programmers are included here because they work in research as well as program. A few of these people pre-date the invention of the digital computer; they are now regarded as computer scientists because their work can be seen as leading to the invention ...
