(PDF) TYPICAL QUESTIONS & ANSWERS OBJECTIVE TYPE QUESTIONS

Computer security, cybersecurity or information technology security (IT security) is the protection of computer systems from theft or damage to their hardware, software or electronic data, as well as from disruption or misdirection of the services they provide.. The field is growing in importance due to increasing reliance on computer systems, the Internet and wireless networks such as ...

Computer security - Wikipedia

A computer is a device that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming.Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.
