Modern kinetic methods coupled with high resolution structural data provide a powerful tool to establish reaction mechanisms. In this intensive four-day course taught by Dr. Kenneth A. Johnson, modern kinetic analysis using a variety kinetic and equilibrium methods will be detailed using numerous examples on proteins and nucleic acids.

Rendering or image synthesis is the automatic process of generating a photorealistic or non-photorealistic image from a 2D or 3D model (or models in what collectively could be called a scene file) by means of computer programs. Also, the results of displaying such a model can be called a render. A scene file contains objects in a strictly defined language or data structure; it would contain ...
