MAINTENANCE/SAFETY TRAINING SYLLABUS

What is a computer? I guess the easiest way I can explain it is as a little machine that follows very specific instructions over and over. A computer cannot learn and, unless told to do so, won't respond to anything. Think of it as a very dumb dog that you have to teach to catch a ball every day and every time you want to play.1

The Complete Guide to Home Computer Maintenance 1. Blow out and clean your computer regularly Your computer is made up of many moving parts, and these parts get hot during use causing the metal to expand and then contract while cooling down again. This promotes unavoidable wear and tear and will cause parts to fail after so many uses.
