Figure 9 -- The two governance structures are stable but the transition is unstable. Although organizational design might be simpler if it were possible to aggregate eclectic "best practices" across multiple disciplines, organizations cannot blindly mix practices without concern for complements among them [18, 69, 96, 105]. Creating a self-reinforcing organization can depend not only on which ...

A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi. Network computer devices that originate, route and terminate the data are called ...
