A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi. Network computer devices that originate, route and terminate the data are called ...

The illuminated ceiling was once popular in the 1960s and 1970s but fell out of favor after the 1980s. This uses diffuser panels hung like a suspended ceiling below fluorescent lights, and is considered general lighting. Other forms include neon, which is not usually intended to illuminate anything else, but to actually be an artwork in itself. This would probably fall under accent lighting ...

1. Introduction. Learning to write is fundamental to becoming literate, and proficiency with writing is crucial to academic achievement, employment, and promotion in the workplace (Graham & Perin, 2007). For most students, learning to write and becoming a competent writer requires deliberate instruction (Raban & Scull, 2013), which typically occurs in school settings.

The CALPHAD calculations were used to predict the microstructure of the NbTaTiV alloy. Fig. 1 shows the predicted equilibrium and non-equilibrium phase mole fraction versus temperature plots in the alloy system. A single BCC solid solution is predicted to form with the bulk composition of Nb 23.8 Ta 25.5 Ti 24.9 V 25.8, atomic percent (at). The calculated liquidus and solidus temperatures are T ...

The English cathedral of the 18th-21st centuries still awaits concerted research regarding their interior mortuaryscapes. This paper seeks to remedy this oversight by exploring how dislocated monuments and remains of the 'ancient' dead were, and are, navigated and narrated by late modern/modern audiences.
