### **SAS Functi ons by Example**

In the field of 3D computer graphics, deferred shading is a screen-space shading technique. It is called deferred because no shading is actually performed in the first pass of the vertex and pixel shaders: instead shading is "deferred" until a second pass.. On the first pass of a deferred shader, only data that is required for shading computation is gathered.

### **Deferred shading - Wikipedia**

Media Computation Teachers Website Media Computation (nicknamed "MediaComp") is a contextualized approach to introducing computing using a ubiquitous theme of manipulating media. The critical characteristic of MediaComp is that students create expressive media by manipulating computational materials (like arrays and linked lists) at a lower-level of abstraction.
