BLENDING AND CONCEPTUAL INTEGRATION

The engineering design process is a methodical series of steps that engineers use in creating functional products and processes. The process is highly iterative - parts of the process often need to be repeated many times before another can be entered - though the part(s) that get iterated and the number of such cycles in any given project may vary. ...

planning and implementation of gender analysis, it is essential that all stakeholders use common language and have a shared understanding of

A Conceptual Overview

Database design is the organisation of data according to a database model. The designer determines what data must be stored and how the data elements interrelate. With this information, they can begin to fit the data to the database model.
