A conceptual model is a representation of a system, made of the composition of concepts which are used to help people know, understand, or simulate a subject the model represents. It is also a set of concepts. Some models are physical objects; for example, a toy model which may be assembled, and may be made to work like the object it represents.. The term conceptual model may be used to refer ...

A concept is instantiated (reified) by all of its actual or potential instances, whether these are things in the real world or other ideas.. Concepts are studied as components of human cognition in the cognitive science disciplines of linguistics, psychology and philosophy, where an ongoing debate asks whether all cognition must occur through concepts.. Concepts are used as formal tools or ...
