Our paper addresses a conceptual gap by focusing on the policymaking processes that underpin policy mixes for sustainability transitions. • We combine insights from the policy feedback literature with research on policy mixes and politics in the sustainability transitions literature.

The co-evolution of policy mixes and socio-technical

A cyclic compound (ring compound) is a term for a compound in the field of chemistry in which one or more series of atoms in the compound is connected to form a ring. Rings may vary in size from three to many atoms, and include examples where all the atoms are carbon (i.e., are carbocycles), none of the atoms are carbon (inorganic cyclic compounds), or where both carbon and non-carbon atoms are ...

Owing to its wide (3.4 eV) and direct-tunable band gap, gallium nitride (GaN) is an excellent material platform for UV photodetectors. GaN is also stable in radiation-rich and high-temperature environments, which makes photodetectors fabricated using this material useful for in-situ flame detection and combustion monitoring.

Community policing, or community-oriented policing, is a strategy of policing that focuses on building ties and working closely with members of the communities. A formal definition states: "Community policing is a philosophy of full service

personalized policing, where the same officer patrols and works in the same area on a permanent basis, from a decentralized place, working in a proactive ...
