There exists a high prevalence of OSA in the general population, a great proportion of which remains undiagnosed. The snoring, tiredness, observed apnea, high BP, BMI, age, neck circumference, and male gender (STOP-Bang) questionnaire was specifically developed to meet the need for a reliable, concise, and easy-to-use screening tool.

Overview. Malaria continues to be a major health problem in many parts of the world. Delay in treatment, especially of cases caused by *P. falciparum* – the species of the parasite that is the main cause of the severe forms of the disease – may result in rapid deterioration in the patient's condition, and in the development of life-threatening complications.
