COLT18 - LEARNING THEORY

conference on group theory pdf

Muted Group Theory (MGT), created by Edwin Ardener and Shirley Ardener in 1975, is a communication theory that focuses on how marginalized groups are muted and excluded via the use of language. The main idea of MGT is that "Language serves its creators better than those in other groups who have to learn to use the language as best they can."

Muted group theory - Wikipedia

Johan Håstad is a theoretical computer scientist best known for his work on complexity theory. He has received two Gödel prizes, one in 1994 for his work on circuit lower bounds and one in 2011 for his work on hardness of approximation.

Why do we exist? The National Playwork Conference is the only major gathering of playwork people from across the UK with additional guests hailing from other parts of the world.

The National Playwork Conference - Home

UFO conspiracy theories argue that various governments, and politicians globally, most notably the officials of Washington, D.C., are suppressing evidence of extraterrestrial unidentified flying objects and alien visitors. Such conspiracy theories commonly argue that Earth governments, especially the Government of the United States, are in communication or cooperation with extraterrestrials ...

Yisong Yue is an assistant professor in the Computing and Mathematical Sciences Department at the California Institute of Technology. His research interests lie primarily in the theory and application of statistical machine learning.

Yisong Yue | Machine Learning Professor @ Caltech

The Centre for Risk Studies provides frameworks for recognising, assessing and managing the impacts of systemic threats. The research programme is concerned with catastrophes and how their impacts ripple across an increasingly connected world with consequent effects on the international economy, financial markets, firms in the financial sectors and global corporations.
