This paper looks at a number of reasons why this model was introduced, the history behind it being introduced and why it has been largely ineffective in becoming a dominant model within mental health practice.

### **The Rise and Fall of the Mental Health Recovery Model**

A mental disorder, also called a mental illness or psychiatric disorder, is a behavioral or mental pattern that causes significant distress or impairment of personal functioning. Such features may be persistent, relapsing and remitting, or occur as a single episode. Many disorders have been described, with signs and symptoms that vary widely between specific disorders.

### **Mental disorder - Wikipedia**

A psychiatric assessment, or psychological screening, is the process of gathering information about a person within a psychiatric service, with the purpose of making a diagnosis. The assessment is usually the first stage of a treatment process, but psychiatric assessments may also be used for various legal purposes. The assessment includes social and biographical information, direct ...
