A float switch is a type of level sensor, a device used to detect the level of liquid within a tank. The switch may be used to control a pump, as an indicator, an alarm, or to control other devices.. One type of float switch uses a mercury switch inside a hinged float. Another common type is a float that raises a rod to actuates a microswitch. One pattern uses a reed switch mounted in a tube; a ...

Cavitation is a phenomenon in which rapid changes of pressure in a liquid lead to the formation of

small vapor-filled cavities, in places where the pressure is relatively low.. When subjected to higher pressure, these cavities, called "bubbles" or "voids", collapse and can generate an intense shock wave.. Cavitation is a significant cause of wear in some engineering contexts.
